Real estate experts talk about the value of curb appeal and how important it is to enhance a house's appearance as seen from the street because first impressions are lasting. It can affect the sale of a house.

That's all well and good for houses visible from the street, but in the case of the yellow clapboard house at 3791 Congress St., the curious will either have to take the homeowners' word that their classic colonial has loads of curb appeal or make an appointment to see it for themselves.

This 6,500-square-foot house, built in 1997, is definitely one of Fairfield's hidden gems. Only those who have reason to travel down the long, cherry tree-lined driveway are able to witness its curb appeal. And if they think that's a sight to behold wait until they get to the backyard of this 2.28-acre estate located in the Greenfield Hill neighborhood, a community that is listed on the [National Register of Historic Places](#). This rural section of town has a 2-acre minimum for lots under zoning regulations.

It has an elongated oval Gunite in-ground swimming pool and spa, pergola, bluestone patio, mahogany deck, stone walls, and a white picket fence. The well-maintained landscape includes lighting, and perennial and specimen gardens with irises, allium, holly, rhododendrons, peonies, azaleas and a host of flowering plants.

The property also boasts a pool house with a bamboo floor, full kitchen, dressing room, full bath, laundry closet, built-in hair dryer by the double vanity and sliding door to the patio — an ideal set up for entertaining.

The location of the property coupled with the fact that it is surrounded by protected open space provides an abundance of privacy, and yet, the house is not completely isolated. It is walking distance to the center of Greenfield Hill and the town's annual Dogwood Festival as well as the [Greenfield Hill Grange](#) hall and Greenfield Farm.

Stop by the farm on the way home from work for fresh produce to prepare in the chef's kitchen, which features a tumbled marble backsplash, granite counters, Viking Professional six-burner range top in the long center island, built-in desk area and glass-front cabinets. The island is two-tiered and creates a breakfast bar for four. There is also a bay window in the eat-in area, where there is a door to the mahogany deck.

Throughout the house there are upgrades to the moldings and floors of the formal living and dining rooms, which have double borders of inlaid
